SEGGER LICENSE AGREEMENT
AND LIMITED WARRANTY

IMPORTANT — READ CAREFULLY

This license statement and limited warranty constitutes a legal agreement ("License Agreement") between you (either as an individual or a single entity) and SEGGER ("SEGGER") for the SEGGER Embedded Studio software product ("Software") , including any software, media, and accompanying on-line or printed documentation.

For the purpose of this agreement “Company” means a single legal entity as specified on the related PO and order confirmation.

BY INSTALLING, COPYING, OR OTHERWISE USING THE SOFTWARE, YOU AGREE TO BE BOUND BY ALL OF THE TERMS AND CONDITIONS OF THE LICENSE AGREEMENT.

Upon your acceptance of the terms and conditions of the License Agreement, SEGGER grants you the right to use the Software in the manner provided below.

This Software is licensed by SEGGER and is protected by copyright law and international copyright treaty. Therefore, you must treat this Software like any other copyrighted material (e.g., a book), except that you may either make one copy of the Software solely for backup or archival purposes or transfer the Software to a single hard disk provided you keep the original solely for backup or archival purposes.

You may transfer the Software and documentation on a permanent basis provided you retain no copies and the recipient agrees to the terms of the License Agreement. Except as provided in the License Agreement, you may not transfer, rent, lease, lend, copy, modify, translate, sublicense, time-share or electronically transmit or receive the Software, media or documentation. You acknowledge that the Software in source code form remains a confidential trade secret of SEGGER and therefore you agree not to modify the Software or attempt to reverse engineer, decompile, or disassemble the Software, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation.

FREE OF CHARGE LICENSE FOR EVALUATION, HOBBYIST NON-COMMERCIAL, AND EDUCATIONAL PURPOSES

There is no time or code size limit in place, and you may still use this software for

I. Evaluation purposes
II. Educational purposes
III. Hobbyist (non-commercial) purposes

free of charge without purchasing a commercial license.
Using the Software without a commercial license for any commercial purpose, especially using the generated executable for production, is prohibited.

EVALUATION PURPOSES means you shall only use the Software to try it out, test it, and determine further use.

HOBBYIST NON-COMMERCIAL and EDUCATIONAL PURPOSES means the Software can be used by you, as a private individual, student, tutor or teacher,

- in universities
- in colleges
- in non-profit organizations
- at home

for

- classes
- training
- self-education
- non-commercial projects

without the need to purchase a commercial license, if the Software is used for teaching, learning, studying, and hobbyists purposes only.

You shall not use the Software within universities, colleges, or non-profit organizations

- for any commercial purposes or project or other undertaking, intended for profit

- to earn money or reasonably anticipate the receipt of monetary gain from it
- to develop, debug, program, or manufacture a commercial product (or parts thereof)
- or to develop any software intended to be covered by a software patent

without purchasing a commercial license.

ADDITIONAL LICENSE TERMS FOR SEGGER EMBEDDED STUDIO

SEGGER grants to you as an individual, a personal, non-exclusive license to install and use the Software for the sole purposes of designing, developing, testing, and deploying application programs which you create. You may install a copy of the Software on a computer and freely move the Software from one computer to another. If you are an entity, SEGGER grants you the right to designate as many individuals within your organisation as you have purchased licenses for, to have the right to use the Software in the manner provided above. However, the use of the Software is limited to the specific license model purchased.

J-Link locked License (default):
The J-Link locked License entitles an individual to use the Software for and with a specific SEGGER J-Link debug probe only, identified by its unique serial number. The specific SEGGER J-Link debug probe serves as a hardware lock (dongle). A hardware lock is a device to be attached to one of the computer's external ports, which allows the individual to move the license to another computer.

The SEGGER J-Link locked License may be used by an individual only on a single, self-contained computer unit (stationary or portable), directly and physically connected to the SEGGER J-Link debug probe. A switch of the specific SEGGER J-Link debug probe to another SEGGER J-Link debug probe may be allowed by SEGGER; provided that the initial SEGGER J-Link debug probe has been identified and approved as defective by SEGGER. The Software may not be accessed by other individuals from or on other computer units NOT directly and physically connected to the specific SEGGER J-Link (except for access via J-Link tunnel mode) .

The number of individuals within your organisation to use the Software under this J-Link locked License model, if more than one, is defined by the number of SEGGER J-Link debug probes identified by their unique serial numbers on the PO and related order confirmation.

PC locked license (on request):
A PC-locked License is a personal, non-exclusive license for an individual to use the Software while locked to the MAC address of a PC where the software is installed.
The PC-locked License may be used by the individual only on one single, self-contained computer unit (stationary or portable), designated and identified through its MAC address or other means of identification. PC locked license are available from SEGGER upon request.

Multi-user License (on request):
A Multi-user License, located on a single designated license server such as a network server and used by multiple individuals on a network and for a maximum number of concurrent users is available from SEGGER upon request. The Multi-user License defines the number of individuals within your organisation to use the Software concurrently, as defined on the PO and related order confirmation.

Company-wide License (on request):
A Company-wide License entitles you, as a Company, the right to designate an unlimited number of persons employed by you to use the Software in connection with the development and creation of your Products.
A Company-wide License forgoes the need to activate the software each time it is installed on another computer within your Company.
The use of the Software by your Consultants or Affiliates is not permitted and requires the purchase of additional licenses.

Build Server License (on request):
A Build Server License entitles you to use the Software for building projects in automated environments, such as build servers or continuous integration systems.
A Build Server License may not be used to actively develop a project, for example to set up the project, add sources, or modify project options, or to build projects which have been developed without a commercial use license.

A Build Server License is not locked to the hardware and is permissibly installed and used on one single computer unit or virtual machine instance.

Device Based License:
In cooperation with selected silicon vendors, Embedded Studio is made available free of charge. The device based license entitles an individual to use the Software for and with the specified devices only. In order to make use of the device based license an activation key is required.

ADDITIONAL LICENSE TERMS FOR SEGGER MIDDLEWARE SOFTWARE COMPONENTS LICENSED AS SEGGER EMBEDDED STUDIO PRO

SEGGER offers an additional package of middleware components in object code form as specified in the related PO and order confirmation to be used for and with the SEGGER Embedded Studio toolchain for the target CPUs the SEGGER Embedded Studio has been licensed for. The SEGGER middleware components licensed as SEGGER Embedded Studio PRO consists of the components listed at https://www.segger.com/espro.
The additional license entitles an individual to use the additional software for and with a specific SEGGER Embedded Studio license as identified by its unique serial number of the J-link debug probe. YOU may use the software for and with the SEGGER Embedded Studio Toolchain to create one or more programs executable on your embedded target system. The resulting software as executable code may be shipped with this equipment royalty free. Any distribution or shipment of Source Code or code in linkable form (e.g. Object Code) requires the prior written authorization from SEGGER. The individual working with SEGGER Embedded Studio on a project for your company may work with the software on one and only one personal computer physically connected to the SEGGER J-Link debug probe. The software or parts thereof are in "use" on a personal computer when it is loaded into temporary memory (i.e. RAM) or installed into permanent memory (e.g., hard disk, CD-ROM, or other storage device) of that personal computer. YOU may not install and use the software on a server or make the software available on a network or in any way provide the software or parts thereof to multiple users, unless you have first purchased additional SEGGER EMBEDDED STUDIO PRO licenses. You shall not use or port the software on another toolchain or target CPU other than it has been licensed for.

SEGGER EMBEDDED STUDIO PRO FREE OF CHARGE LICENSE FOR EVALUATION, HOBBYIST NON-COMMERCIAL, AND EDUCATIONAL PURPOSES

YOU may use SEGGER Embedded Studio PRO for
I. Evaluation purposes
II. Educational purposes
III. Hobbyist (non-commercial) purposes

free of charge, without purchasing a commercial license.
Using SEGGER Embedded Studio PRO or parts of it without a commercial license for any commercial purpose, is prohibited

EVALUATION PURPOSES means you shall only use the Software to try it out, test it, and determine further use.

NON-COMMERCIAL and NON-PROFIT EDUCATIONAL PURPOSES means Embedded Studio PRO can be used by you, as a private individual, student, tutor or teacher,

- in universities
- in colleges
- in non-profit organizations
- at home

for

- classes
- training
- self-education
- non-commercial projects

without the need to purchase a commercial license, if the Software is used for teaching, learning, studying, and hobbyists purposes only.

You shall not use Embedded Studio PRO within universities, colleges, or non-profit organizations

- for any commercial purposes or project or other undertaking, intended for profit
- to earn money or reasonably anticipate the receipt of monetary gain from it
- to develop, debug, program, or manufacture a commercial product (or parts thereof)

- or to develop any software intended to be covered by a software patent

without purchasing a commercial license.

Any other use of the SEGGER Embedded Studio PRO without the purchase of a commecial license is prohibited and illegal! If there is any doubt if a certain use may be considered within the foregoing scope, or whether your use of the SEGGER Embedded Studio PRO applies to an educational or non-profit situation, it is strongly recommended to get in touch and consult SEGGER prior to use.

For clarification purposes: A student using SEGGER Embedded Studio PRO direct or indirect in a business or profit organization (e.g. a company) is considered a violation of the scope of this agreement.

GENERAL TERMS THAT APPLY TO COMPILED PROGRAMS AND REDISTRIBUTABLES

You may write and compile your own application programs using the Software, including any libraries and source code included for such purpose with the Software. You may reproduce and distribute, in executable form only, programs which you create using the Software without additional license or fees, subject to all of the conditions in this statement.

SEGGER products may include certain files ("Redistributables") intended for distribution by you to the users of programs you create. The Redistributables for the Software are only those files specifically designated as such by SEGGER. From time to time, SEGGER may designate other files as Redistributables. You should refer to the documentation, including any "readme" or "deploy" files included with the Software, for additional information.

Subject to all of the conditions in this statement, you may reproduce and distribute exact copies of the Redistributables, provided that such copies are made from the original copy of the Software or the copy transferred to the single hard disk. Copies of Redistributables may only be distributed with and for the sole purpose of executing application programs permitted under this statement that you have created using the Software. Under no circumstances may any copies of Redistributables be distributed separately. Regardless of any modifications which you make and regardless of how you might compile, link, and/or package your programs, under no circumstances may the libraries (including runtime libraries), code, Redistributables, and/or other files of the Software (including any portions thereof) be used for developing programs by anyone other than you. Only you as the licensed user (or the Named User for your entity) have the right to use the libraries (including runtime libraries), code, Redistributables, or other files of the Software (or any portions thereof) for developing programs created with the Software. In particular, you may not share copies of the Redistributables with other co-developers. You may not reproduce or distribute any SEGGER documentation without SEGGER's permission.

The license granted in this statement for you to create your own compiled programs and distribute your programs and the Redistributables (if any) is subject to all of the following conditions: (i) you may not remove or alter any SEGGER copyright, trademark or other proprietary rights notice contained in any portion of SEGGER libraries, source code, Redistributables or other files that bear such a notice; (ii) SEGGER provides no warranty at all to any person, other than the Limited Warranty provided to the original purchaser of the Software, and you will remain solely responsible to anyone receiving your programs for support, service, upgrades, or technical or other assistance, and such recipients will have no right to contact SEGGER for such services or assistance; (iii) you will indemnify and hold SEGGER, its related companies and its suppliers, harmless from and against any claims or liabilities arising out of the use, reproduction or distribution of your programs; (iv) your programs must be written using a licensed, registered copy of the Software; (v) regardless of any modifications which you make and regardless of how you might compile, link, or package your programs, the libraries (including runtime libraries), code, Redistributables, and/or other files of the Software (including any portions thereof) may not be used in programs created by your end users (i.e., users of your programs) and may not be further redistributed by your end users; and (vi) you may not use SEGGER's or any of its suppliers' names, logos, or trademarks to market your programs, except to state that your program was written using the Software.

All SEGGER libraries, source code, Redistributables and other files remain SEGGER's exclusive property. Regardless of any modifications that you make, you may not distribute any files (particularly SEGGER source code and other non-executable files) except those that SEGGER has expressly designated as Redistributables. Nothing in the License Agreement permits you to derive the source code of files that SEGGER has provided to you in executable form only, or to reproduce, modify, use, or distribute the source code of such files. You are not, of course, restricted from distributing source code or byte code that is entirely your own.

LIMITED WARRANTY

Except with respect to the Redistributables, which are provided "as is," without warranty of any kind, SEGGER

warrants that the Software, as updated and when properly used, will perform substantially in accordance with the accompanying documentation, and the Software media will be free from defects in materials and workmanship, for a period of one (1) year from the date of receipt. Any implied warranties on the Software are limited to one (1) year.

SEGGER's and its suppliers' entire liability and your exclusive remedy shall be, at SEGGER's option, either (a) return of the price paid, or (b) repair or replacement of the Software that does not meet SEGGER's Limited Warranty and which is returned to SEGGER with a copy of your receipt. DO NOT RETURN ANY PRODUCT UNTIL YOU HAVE CALLED SEGGER AND OBTAINED A RETURN AUTHORIZATION NUMBER. This Limited Warranty is void if failure of the Software has resulted from accident, abuse, or misapplication. Any replacement Software will be warranted for the remainder of the original warranty period or thirty (30) days, whichever is longer. Outside Germany, neither these remedies nor any product support services offered by SEGGER are available without proof of purchase from an authorised non-german source.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, SEGGER AND ITS SUPPLIERS DISCLAIM ALL OTHER WARRANTIES AND CONDITIONS, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT, WITH REGARD TO THE SOFTWARE, AND THE PROVISION OF OR FAILURE TO PROVIDE SUPPORT SERVICES.

LIMITATION OF LIABILITY TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL SEGGER OR ITS SUPPLIERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR ANY OTHER PECUNIARY LOSS) ARISING OUT OF THE USE OF OR INABILITY TO USE THE SOFTWARE PRODUCT OR THE PROVISION OF OR FAILURE TO PROVIDE SUPPORT SERVICES, EVEN IF SEGGER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN ANY CASE, SEGGER'S ENTIRE LIABILITY UNDER ANY PROVISION OF THIS LICENSE AGREEMENT SHALL BE LIMITED TO THE AMOUNT ACTUALLY PAID BY YOU FOR THE SOFTWARE PRODUCT PROVIDED, HOWEVER, IF YOU HAVE ENTERED INTO A SEGGER SUPPORT SERVICES AGREEMENT (if any) , SEGGER'S ENTIRE LIABILITY REGARDING SUPPORT SERVICES SHALL BE GOVERNED BY THE TERMS OF THAT AGREEMENT.

HIGH RISK ACTIVITIES

The Software is not fault-tolerant and is not designed, manufactured or intended for use or resale as on-line control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communication systems, air traffic control, direct life support machines, or weapons systems, in which the failure of the Software could lead directly to death, personal injury, or severe physical or environmental damage ("High Risk Activities"). SEGGER and its suppliers specifically disclaim any express or implied warranty of fitness for High Risk Activities.

GENERAL PROVISIONS

This statement may only be modified in writing signed by you and an authorised officer of SEGGER. If any provision of this statement is found void or unenforceable, the remainder will remain valid and enforceable according to its terms. If any remedy provided is determined to have failed for its essential purpose, all limitations of liability and exclusions of damages set forth in the Limited Warranty shall remain in effect.

This statement shall be construed, interpreted and governed by the laws of Germany. This statement gives you specific legal rights; you may have others, which vary, from country to country. SEGGER reserves all rights not specifically granted in this statement.

ADDITIONAL SOFTWARE

This sofware dynamically links against the Qt4 libraries distributed unter the GNU Lesser General Public License v.3 („LGPL“).

GNU LESSER GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the

facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.
