

SEGGER receives ISO 27001 certification, strengthening information security and customer trust

Monheim am Rhein, Germany — February 20, 2026

SEGGER has successfully achieved ISO 27001 certification, confirming that the company's Information Security Management System (ISMS) complies with internationally recognized requirements for managing risk and protecting sensitive information.

Information security is a long-standing priority at SEGGER, guiding the protection of intellectual property and the responsible handling of customer data. ISO/IEC 27001 certification confirms that these principles are firmly anchored in defined organizational processes.

The certified ISMS establishes clear responsibilities, formalized procedures, and measurable controls across key operational areas, including software development, internal IT infrastructure, product releases, and the handling of sensitive information. It ensures that security measures are regularly reviewed and adapted to evolving requirements.

For customers and partners, certification serves as documented third-party validation that SEGGER's information security management follows internationally defined standards, supporting security assessments, compliance reviews, and vendor qualification processes.

"Information security has always been a core principle at SEGGER, deeply embedded in our culture and the way we develop and deliver our products," says Hendrik Sawukajtis, Managing Director, SEGGER. "ISO 27001 certification provides our customers with independent confirmation that our security controls and processes are systematic, mature, and continuously monitored. It reinforces long-term trust and supports the growing compliance needs of our partners, worldwide."

In addition, SEGGER has also successfully completed its ISO 9001 recertification audit, extending certification of the quality management system for another 3 years. ISO 9001 is the international standard for quality management and supports consistent delivery, customer satisfaction, and continuous improvement.

Together, these certifications reflect SEGGER's ongoing commitment to security, quality, and long-term reliability. This commitment is also evident in SEGGER's security-focused product portfolio, which contains solutions such as [emBoot-Secure](#) and others that support secure firmware update workflows and preparation for emerging regulatory requirements, such as the [EU Cyber Resilience Act](#).

###

About SEGGER

Founded in 1992, SEGGER Microcontroller GmbH has over three decades of experience in embedded systems, producing cutting-edge [RTOS and software libraries](#), J-Link and J-Trace [debug and trace probes](#), a line of [Flasher ISPs](#), and [software development tools](#).

SEGGER's all-in-one solution [emPower OS](#) provides an RTOS and a complete spectrum of software libraries for, among other things, communication, security, data compression and storage, user-interface software, and more. emPower OS gives developers a head start, allowing them to benefit from decades of experience in the embedded industry.

SEGGER's professional embedded-development software and tools are simple in design, optimized for embedded systems, and support the entire embedded-system development process with their affordability, high quality, flexibility, and ease of use.

SEGGER, with headquarters in Monheim am Rhein, Germany, also has an office in Boston, Massachusetts, United States, and branch operations in Silicon Valley, California, United States; Shanghai, China; and the United Kingdom. With distributors on most continents, SEGGER's full product range is available worldwide.

Why SEGGER?

In short, SEGGER has a full set of tools for embedded systems, offers support throughout the entire development process, and has decades of experience. We are The Embedded Experts.

Furthermore, SEGGER software has no open-source or attribution licenses, and it can be integrated into any commercial or proprietary product — with no obligation to disclose the combined source. SEGGER offers stability in an often-volatile industry, making it a highly reliable partner for long-term business relationships.
